

Held back from...

Today's sophisticated systems lack true integration. Treasurers are tasked with optimising cash and liquidity. To achieve those ends, they utilise some of the most complex software available. Too often these system don't communicate well with each other.

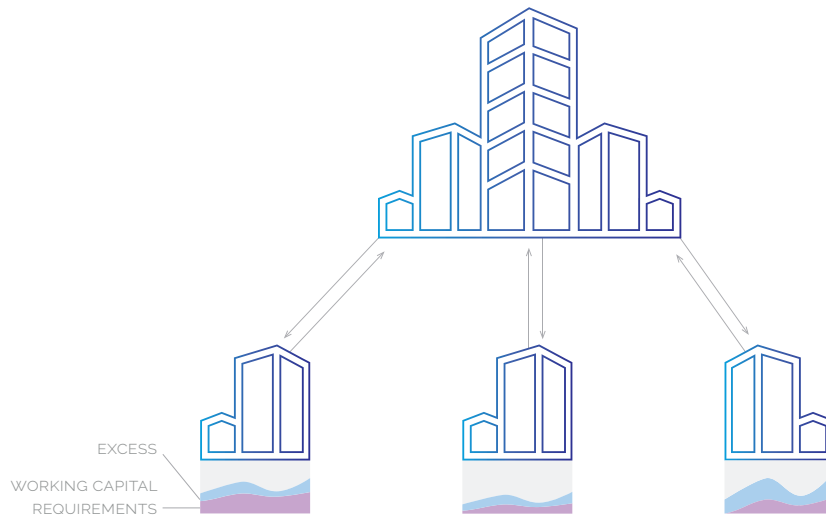

ABOUT ADJOINT

Adjoint is a product and research-focused distributed ledger technology company that offers flexible, scalable, best-in-class solutions for global finance. We empower finance teams to securely exchange value and automate business processes.

...Real time benefits

Our Virtual Account Module sits within your preferred account structure with your cash management banks. Within that account structure - Adjoint Treasury creates virtual accounts for each entity or workflow. Fund movements between accounts take place in real-time on the Uplink distributed ledger.

ENABLE YOUR TREASURY TO ADAPT TO AN EVOLVING DIGITAL WORLD

Consolidation

Consolidate bank accounts and upgrade to instant access to liquidity
